This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I: Claims 1-7 and 32, a system and method of receiving insurance information, searching content of a health data dictionary and identifying a match, classified in class 707, subclass 3.

Group II: Claims 8-14, a system and method for receiving insurance information, changing the insurance information, and storing the changed insurance information, classified in class 705, subclass 4.

Group III: Claims 15-31 and 33, a system and method receiving pharmaceutical data, searching a health data dictionary and selecting a match for a compound, classified in class 707, subclass 104.1 and class 702, subclasses 22-23.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to Sam Rimell at telephone number (571) 272-4084.
